Alternatives to Violence Project workshops are more experiential than theoretical. Together we explore a culture of peace and trust through the principles of respect and caring for self and others. In non-intrusive ways, AVP workshops encourage confidence and practical strategies for dealing with conflict in our homes, workplaces or communities, so that we can get on better with others. AVP workshops are an opportunity to experiment with ways of transforming conflict creatively. We offer a practical approach for community groups, social service agencies, youth organisations and individuals who would like to participate. AVPQ will be delivering a Community Basic level workshop so you can come and be a part of what AVP is doing to make a change ... a change in the way we respond to violence and in the way we deal with difficult situations.
